

Hand Tools

For precise, manual thermoplastic road marking

Make you applications with RME hand tools

RME hand tools are made for thermoplastic material and are available in many widths and with adjustable line thickness. They are used for smaller work made by hand, such as pedestrian crossings, arrows, guidelines, parking areas etc.

- ✓ Several widths - from 5 cm up to 50 cm
- ✓ Easy to work with and high quality
- ✓ Designed and produced in Sweden

Handle options

In stock: Straight handle

Our standard hand tools, ready to ship in all listed widths.

Made to order: Bent, adjustable handle

Produced on demand in the same widths as the straight-handle range. Hand-tools stands, which enable the hand tools to stand up, are included.
