Spare Parts & Components For Road Marking Vehicles

Precision components for professional fleets

At RME, we supply a range of high-quality spare parts and components for road marking vehicles.

Our product portfolio includes both carefully selected third-party components and our own in-house manufactured products, including the well-known RME pumps, bead guns, spray guns and extruders, trusted by professionals across the industry.

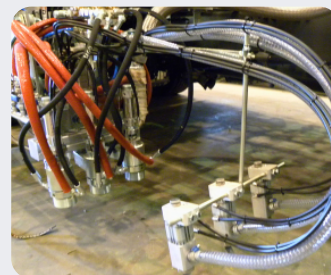

Engineered for Performance and Durability

All our components are designed and selected to meet the demanding conditions of modern road marking operations.

- ✓ **Operational reliability**
- ✓ **Long service life**
- ✓ **Designed and manufactured in Sweden**

In-House Manufacturing Expertise

Our proprietary products, such as RME pumps, extruders and bead guns, are developed and manufactured with emphasis on quality control and technical precision to ensure consistent performance and dependable results in the field.

Spray-guns

Extruders

With RME you gain access to proven components and technical know-how.

Keep your vehicles running at peak efficiency with proven components from RME!
